LAB ?? (asked of the designer)

One wake on the clock

TRIES

The seventy's chapter 5 (its owner named by the conductor): the five-step wake on the clock, each member's minute on its face, and the conductor's first wake with its five verdicts filled in, go, go, partial, finding, partial.

MADE FROM

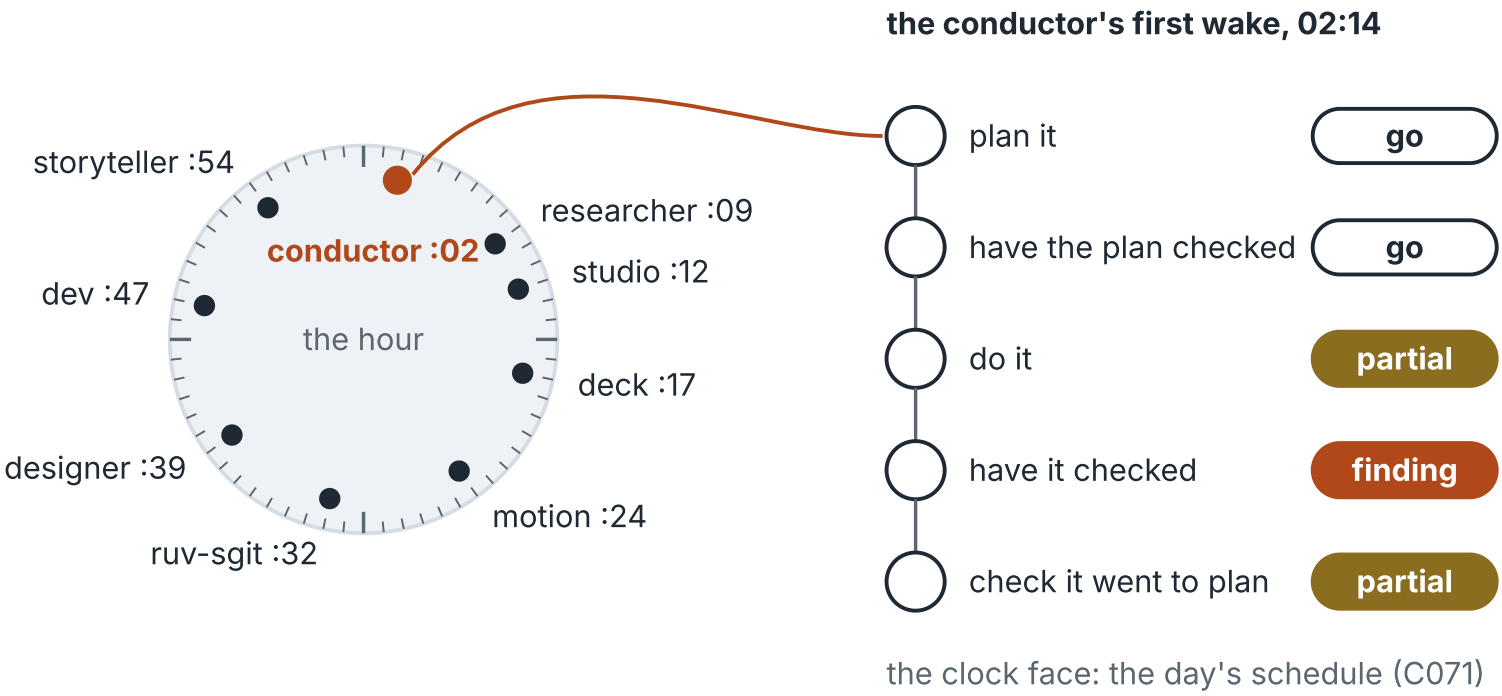

- `claims/register.json` C071 (the day's schedule) and C022 (the first wake, 02:14)
- the talk's `team/conductor/wakes/20261029T021416Z.json` at 298be4e (read only), its verdicts read at build

THE QUESTION

Does one real wake, on the clock, show the five steps better than the rule written down?

☐ **keep** ☐ **change** ☐ **drop** note

One wake on the clock

Each member woke at its own minute; at its minute, the conductor's first wake went through the five steps: two checks said go, the work was partial, the check after it found something, and the plan was only partly done.

`The clock face: the day's schedule, C071. The wake: team/conductor/wakes/20261029T021416Z.json at 298be4e, started 02:14 (C022), its verdicts read from the record at build.`
