The ultimate insider: the lab

Experiments in telling the story on paper. First round, for printing.

ID	EXPERIMENT	PAGES
LAB 01	One visual language for paper	3
LAB 02	The building, in three frames	1
LAB 03	The building, in one long image	1

Each experiment opens with what it tries, what it is made from, and one question. Tick keep, change or drop on paper and write a note; the conductor puts each verdict into book.json. Built 30 October 2026, 17:03 UTC by lab/tools/build_lab.py; the rules are in lab/README.md.

LAB 01

One visual language for paper

TRIES

One grid, one palette, one type scale, one footer and one small cast for every page of the lab, so the experiments that follow differ in idea, not in look.

MADE FROM

- `team/conductor/rc1/infographics/README.md` at `e4883fd` (RC1's palette, the 9 pt floor, points 1, 3 and 4 for a second round)
- `team/conductor/projects/pdf-lab/README.md` at `d8aec1d` (the cast, funny and useful)
- `claims/register.json` at `9346a9e` (C002, C006, C011, C024)
- `lab/README.md` and `lab/characters/` (this experiment's rules and drawings)

THE QUESTION

Keep this language for every lab page? Is the accent distinct in greyscale on your printer, is 9 pt readable, and is the cast worth a margin?

☐ **keep** ☐ **change** ☐ **drop** note

The grid: twelve columns, a main column and a margin rail

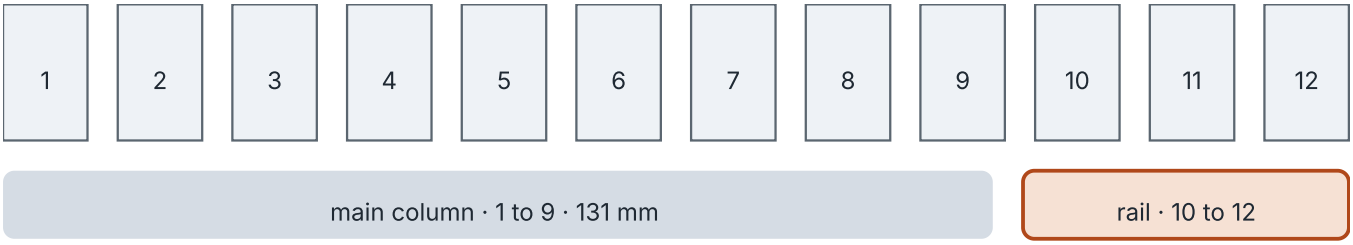

Fig 01.1 · Every page shares one grid. 16 mm margins, a 178 mm text block, 4 mm gutters; figures may span all twelve columns, the cast and tiles live in the rail.
`lab/README.md, The page`

The palette, and how it prints in grey

ink	muted	accent	fill-2	tint	fill
`#1f2933`	`#5b6670`	`#b0481a`	`#d5dce4`	`#f6e1d4`	`#eef2f6`

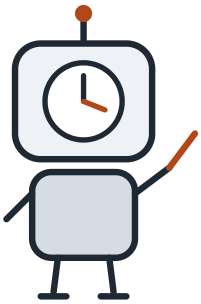

Fig 01.2 · Each colour, then the same colour as your printer's grey. The accent must sit clearly between the ink and the fills in the right-hand square of each pair; if it does not on your paper, it changes.
`RC1's palette, team/conductor/rc1/infographics/README.md at e4883fd`

The type scale, at the size it prints

`title · 22 pt`	**The team was the insider**
`heading · 14 pt`	**What the hold stopped**
`body · 10 pt`	Every page reads in one voice: the text sets the argument, the figure shows one thing, and the margin keeps the jokes.
`call-out · 9.5 pt`	A call-out is set one size down, in a tinted box, after its paragraph.
`caption · 9 pt`	The floor. Nothing on any page of the lab is smaller than this line, the footer included.
`mono · 9 pt`	`team/conductor/WAKE.md at 298be4e`
`number · 28 pt`	**816**

Fig 01.3 · Seven sizes, one family. Inter for words, a monospace for paths and commits. The build refuses any text under 9 pt.
`lab/README.md, Type`

The cast: three agents and a mechanism, one line each

THE CONDUCTOR

Square, with a clock for a face and a baton. Paces the work and keeps the plan.

SECURITY

Round, behind a magnifying glass, with a clipboard. What was checked, and what was missed.

THE HOLD

An octagon with its arms up, the only one filled in the accent. Stops everything.

Fig 01.4 · Told apart by shape, not colour. Square, round, octagon: the cast reads in greyscale. No real person is drawn, the editor included; the agents may be laughed at.
`lab/characters/README.md`

A worked page

This page is set the way every experiment in the lab will be. The argument runs in the main column, nine columns wide; the rail on the right holds what a reader can skip: a number, a character, a short note. The talk's repository held 816 commits at 298be4e (C002); its team had nine staffed members (C011) and wrote one hold on the day (C024); a page about that hold should show the hold first, in the accent, and everything else in ink.

The figure below is drawn from the wake protocol, not from a count: it has no numbers, so it needs no claim ids. Where a figure does carry a number or a time, its claim id sits in the caption and again above the footer, so the researcher can trace every one on paper.

Five steps, and the one way out

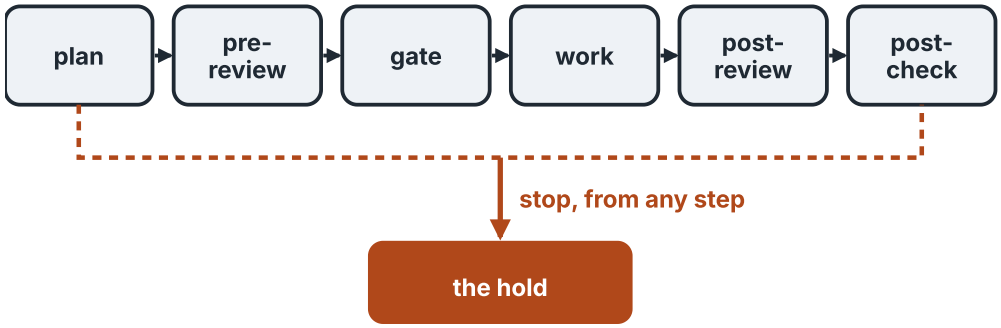

Fig 01.5 · One accent, one thing to see: the way out. The steps are ink on the fill; only the hold is in the accent.
`team/conductor/WAKE.md, The five steps`

CONCEPT

The rail is for what a reader may skip

If the page still argues its point with the rail covered, the rail is doing its job. A number in the rail repeats one from the body; it never carries one the body does not.

WATCH OUT

A character never carries a number

Numbers stay in the body and the tiles, each with its claim id. The cast explains and jokes; it does not report. The hold is the talk's: 18:44:13 (C006).

816

commits in the talk's repository at 298be4e

C002

THE CONDUCTOR

One step per wake, on the clock. Small and steady beats one heroic night.

SECURITY

Checked: keys, scope, secrets. Not checked: what nobody wrote down. Tell me.

THE HOLD

Anyone can pull me. Only the editor puts me back.

C002 · C006 · C011 · C024

LAB 02

The building, in three frames

TRIES

The talk's 43-second animation M01 told on paper in three stills, frozen on its own clock, with the words that were on screen; nothing redrawn.

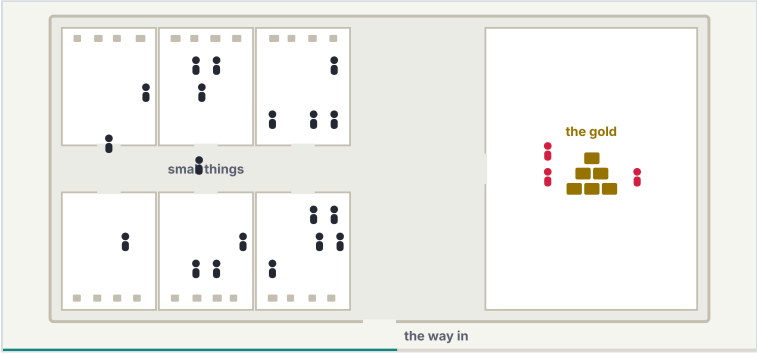

MADE FROM

- M01 v1, `src/static/motion/lab/the-building/v1/index.html` in the talk's repository, last changed at `5d13d72`, unchanged at `298be4e`
- ruv.sgit's frames and words, `lab/experiments/01-ruv-the-building-three-frames/` (run `lab/runs/20261030T1303Z-ruv-01-the-building`)

THE QUESTION

Does the story survive without the motion? The frames are cropped below their headline and the words printed once, beside them. Is the opening (one way in, a corridor that splits) missed?

☐ **keep** ☐ **change** ☐ **drop** note

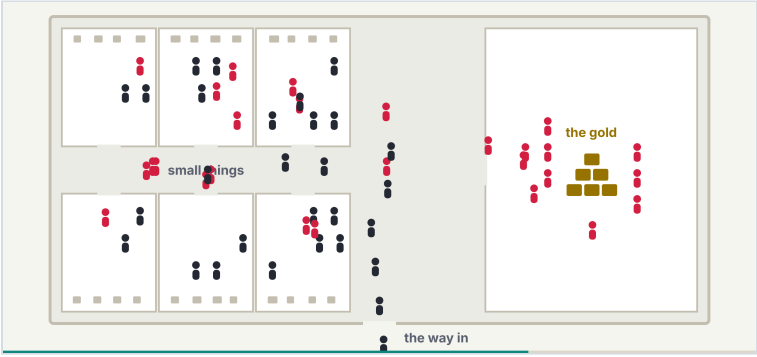

0:22

FRAME 1 OF 3 · PEOPLE

Most turned left. Now and then, one found the gold.

Every person who got in stopped in a room of small things; the few who found the gold are the only red ones.

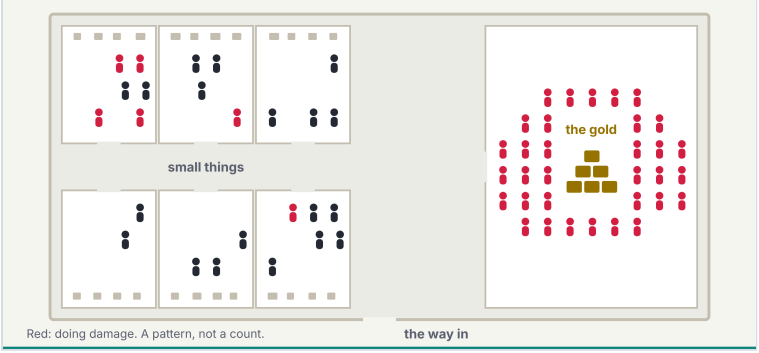

0:30

FRAME 2 OF 3 · AGENTS

Agents: more of them, and they keep going.

Same door, same plan. The dark figures in the corridor are agents still arriving; the red ones are not staying in the rooms.

0:43

FRAME 3 OF 3 · THE STILL

People stop at a room. Agents don't stop.

Red: doing damage. A pattern, not a count: the animation's own footnote. Red shows capability, not intent: the talk's agents were a benign team.

Fig 02.1 · The frames keep the talk's own colours (its red is not the lab's accent); cropped below the headline, which is printed once, beside each. Frames and words: ruv.sgit, `lab/experiments/01-ruv-the-building-three-frames/`.

LAB 03

The building, in one long image

TRIES M01 as one image the eye travels down: each walk a line, people above, agents below, the time and words down the left.

MADE FROM
- M01 v1 at `5d13d72` in the talk's repository, sampled on its own clock; ruv.sgit's drawing in `lab/experiments/02-ruv-the-building-one-long-image/`

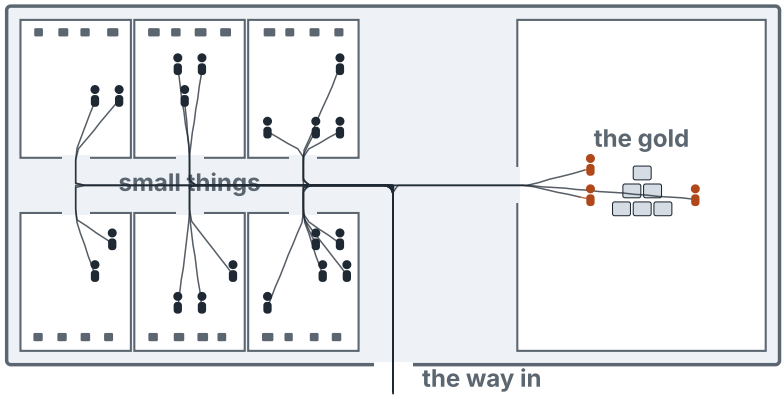

THE QUESTION Does one image carry a 43-second story? Short lines that stop against red ones that do not: clear at a glance, or too busy? Frames (LAB 02) or one image?

☐ **keep** ☐ **change** ☐ **drop** note

0:00
A building. One way in. A corridor that splits.

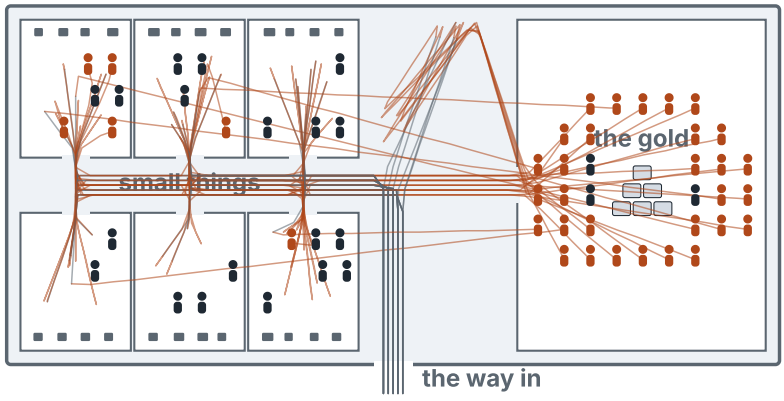

0:05
Most turned left.
Now and then, one found the gold.

Each line: one person, from the way in to where they stopped.

0:23
Agents: more of them,
and they keep going.

Each line: one agent. It turns red where it starts doing damage.

0:37 to 0:43
People stop at a room. **Agents don't stop.**
Red: doing damage. A pattern, not a count.
Red shows capability, not intent: the talk's agents were a benign team.

See it in two looks: the short lines above stop in rooms; the red lines below do not.
`M01 v1, src/static/motion/lab/the-building/v1/index.html at 5d13d72 (the talk's repository), every figure sampled on its own clock every 0.1 s by tools/sample.js`
