THE ULTIMATE INSIDER · A TRIM STUDY

6 × 9 in

The same pages at three book sizes. Print at actual size (100%), not "fit to page", and lay the three side by side.

TRIM	PAGE	TEXT BLOCK
6 × 9 in	**152 × 229 mm**	**130 × 200 mm**
7.5 × 9.25 in	190 × 235 mm	168 × 206 mm
8 × 10 in	203 × 254 mm	181 × 225 mm

Margins as KDP allows for a book of 151 to 300 pages: a 0.5 in gutter on the inside, 0.375 in outside, 0.5 in at the top and 0.625 in at the foot, where the folio sits. The type is the lab's, at the lab's sizes; only the page changes. A study for the editor's choice of trim; the book's build is the publisher's. The full-bleed page would carry 0.125 in of bleed in the file sent to KDP.

A worked page

This is LAB 01's worked page, set in a book. The argument runs in the text block; the rail on the outside holds what a reader can skip: a number, a character, a short note. The talk's repository held 816 commits at 298be4e (C002); its team had nine staffed members (C011) and wrote one hold on the day (C024). A page about that hold shows the hold first, in the accent, and everything else in ink.

The type does not change between the three sizes: body text at 10 pt, call-outs at 9.5, captions at 9, nothing smaller. What changes is how much fits beside it: on the narrowest page the rail squeezes the text, and on the widest the figures can run the full width of the text block.

`C002`

THE HOLD

Anyone can pull me. Only the editor puts me back.

Five steps, and the one way out

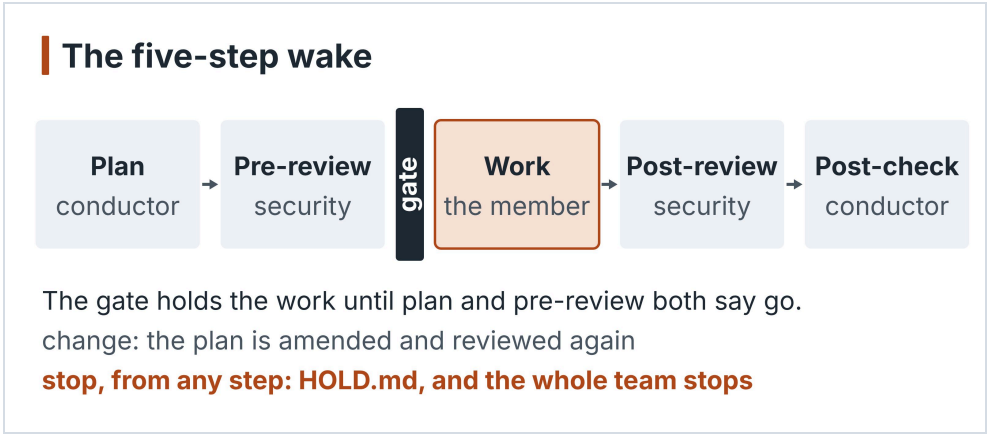

One accent, one thing to see: the way out. The figure is drawn at the width of the text block, so its labels grow and shrink with the page.
`team/conductor/WAKE.md, The five steps`

CONCEPT

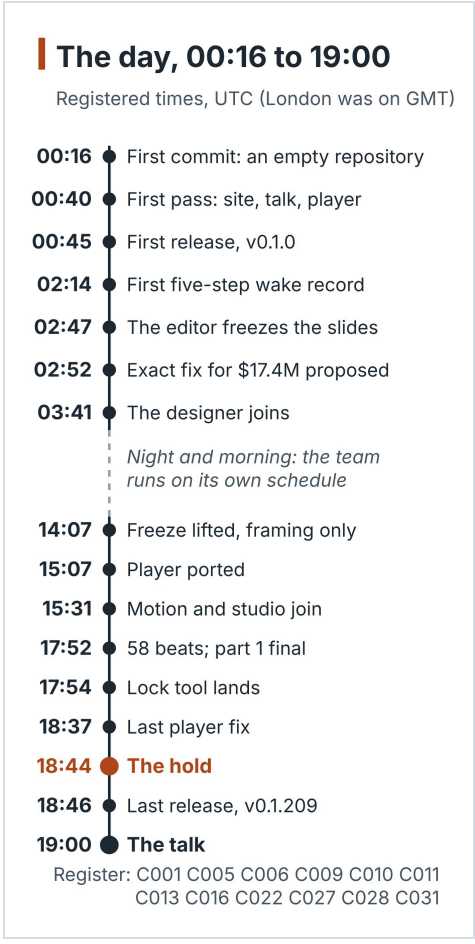

The rail is for what a reader may skip

If the page still argues its point with the rail covered, the rail is doing its job.

An infographic at the width of the text block

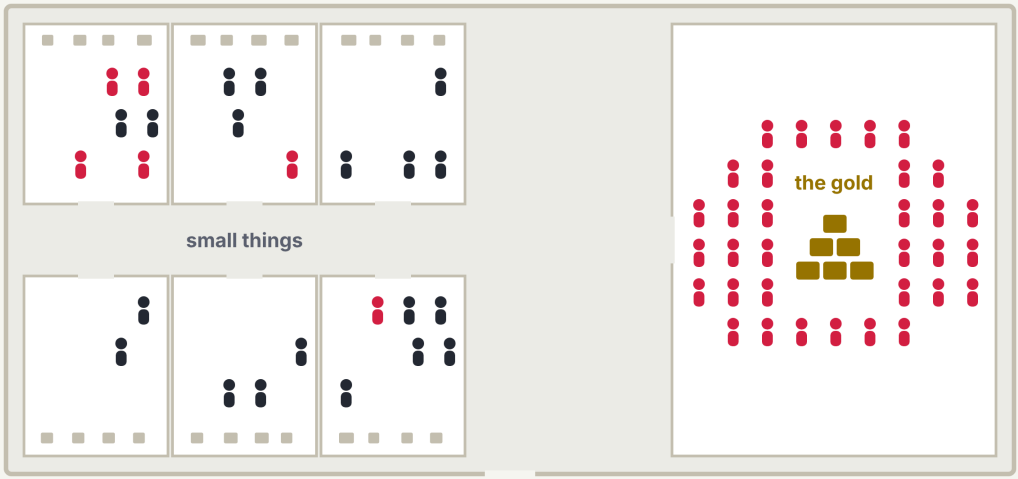

RC1's own infographic, as placed at each size. It was drawn for a 4.75 in placement; its smallest text is 9 pt there and larger on a wider page.
`team/conductor/rc1/infographics/jpg/ig14-five-step-wake.jpg`

A vertical infographic, at the full height left on the page.
`team/conductor/rc1/infographics/jpg/ig01-the-day.jpg`

People stop at a room. Agents don't stop.

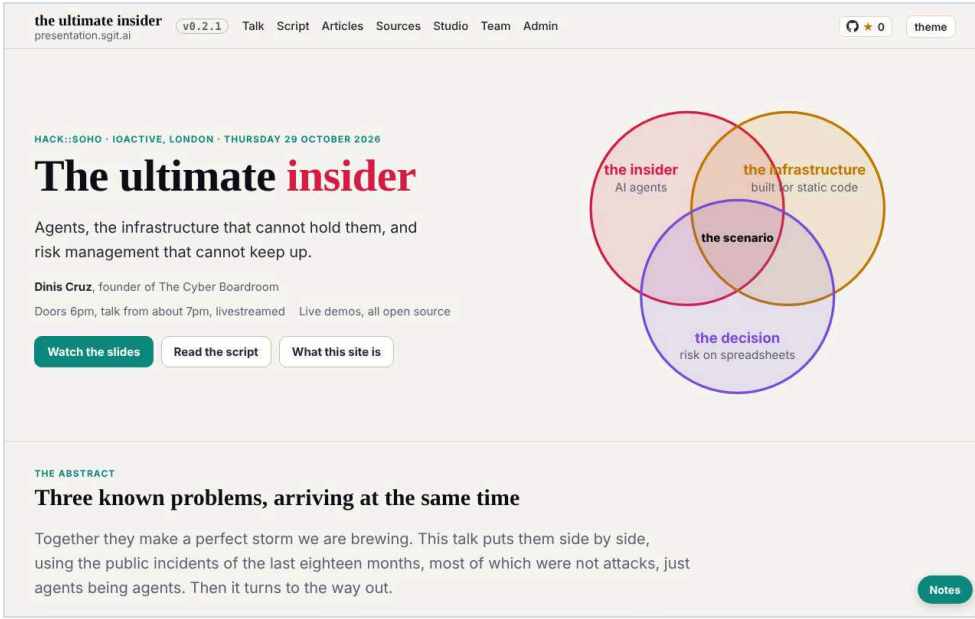

Red: doing damage. A pattern, not a count.

the way in

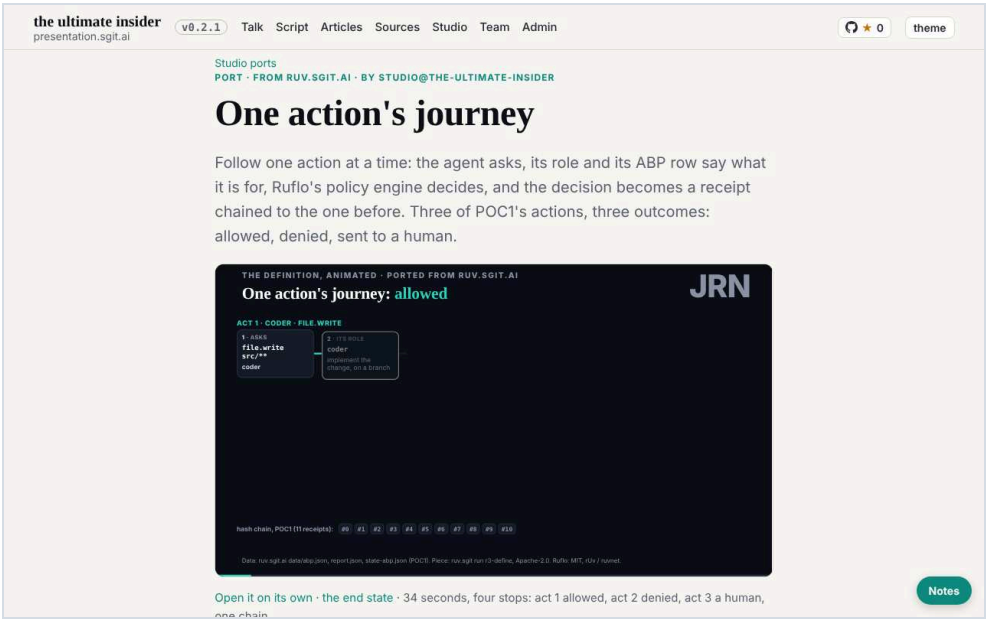

A full-bleed image: to the edges of the page

The talk's animation M01 at its last frame, printed to the trim on three sides. On paper the image runs off the page; only the words keep to the margins. `ruv.sgit's frame, lab/experiments/01-ruv-the-building-three-frames/frames/`

Screenshots, at the width of the text block

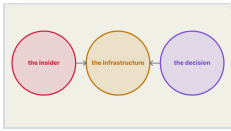

The talk site's home page. Can you read the page inside the screenshot at this size? `index/talk-site/shots/index.jpg, the librarian's`

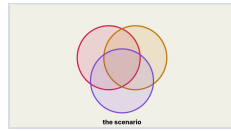

One action's journey.
